

Company announcement no. 07 / 2018  
Trifork, September 14<sup>th</sup>, 2018

## Trifork acquires stake in Danish MedTech company

Trifork has signed an agreement to purchase 19.4% of the share capital to become a shareholder of the Danish MedTech-company reQbo Aps. The Parties will complete the transaction at the end of September 2018. The acquisition will increase Trifork's portfolio of investments in innovative and critical healthcare in Denmark as well as internationally.

reQbo develops solutions for pressure ulcer prevention, capable of intelligently predicting formation of pressure ulcers even before they appear, based on software automated, real time assessment using a high tech multi-sensing mattress. Pressure ulcers can rapidly become a painful, debilitating and potentially serious outcome of deficient routine care, leading to extended hospitalization with accompanying high health and social care costs.

*"reQbo has developed an innovative solution to a well-documented problem in the healthcare sector and combined with Trifork's skills of creating innovative software solutions this has the potential to revolutionize the prediction and prevention of pressure ulcers",* says Jesper Grankær Carøe, Executive Vice President, Trifork.

reQbo is also thrilled about the new agreement and partnership...

*"Onboarding Trifork as our R&D and future strategic Partner on Healthcare software solutions means that we can accelerate our product development and focus on our upcoming market introduction in Europe",* states CEO Jesper Fleischer, reQbo. *"Furthermore, it was important for us to find an investor, which shared our view on the importance of creating high quality, easy to use healthcare solutions".*

Kind regards,  
The board of Directors  
Trifork Holding AG

### About reQbo Aps

The MedTech-company reQbo Aps was founded in 2014 as a spinout from Medicus Engineering Aps and Designit A/S. The vision is to develop the first market solution that offers active prevention of pressure ulcers. reQbo's unique technology enables prediction of pressure ulcers development in a personalized way. The company's main competencies are a deep understanding of applications for the predictive and preventive treatment market and its ability to translate this knowledge into products that are innovative and simple to use in daily healthcare routines.
