This presentation contains forward-looking statements including, but not limited to, statements and expectations concerning expected or projected earnings, strategies, trends and developments. Forward-looking statements are statements (other than statements of historical fact) relating to future events and Trifork's expected, anticipated or planned financial and operational performance.

The words 'may', 'will', 'will continue', 'should', 'expect', 'foresee', 'anticipate', 'believe', 'estimate', 'plan', 'project', 'predict', 'intend', 'guidance' and 'outlook' or variations of these words, including negatives thereof, as well as other statements regarding matters that are not historical fact or regarding future events or prospects, constitute forward-looking statements. Other forward-looking statements can be identified in the context in which the statements are made.

Trifork has based these forward-looking statements on its current views with respect to future events and financial performance. These views involve a number of risks and uncertainties, which could cause actual results to differ materially from those predicted in the forwardlooking statements and from the past performance of Trifork.

Although Trifork believes that the estimates and projections reflected in the forward-looking statements are reasonable, they may prove materially incorrect, and actual results may materially differ, e.g. as the result of risks related to the industry in general or Trifork in particular.

As a result, forward-looking statements should not be relied on as a prediction of actual results. Trifork undertakes no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except to the extent required by law.
